

FireFly Series "Z" Fiber Optic Closure System

A complete watertight closure system for organizing and protecting up to 72 fiber optic splices.

The FireFly Fiber Optic Closure System is a plastic, watertight mechanical housing designed for organizing and protecting up to 72 fiber splice modules. A unique tray hinging system allows the installer to swing trays up and out of the way either side-to-side or front-to-back. The closure will hold up to six splice trays while sufficient room is available below the trays for fiber storage and slack. Each closure kit may be used for straight, branch or butt splicing with no additional components parts required.

Features

- May be used for cut, uncut and taut sheath applications.
- May be used with all fiber optic cable.
- Sheath retention & central strength member termination system included.
- Ribbed closure construction - lightweight plastic offers strength and resistance to chemical and U.V. attack.
- Hinged housing with "slide lock" simplifies installation and reentry with a minimum of tools.

- Re-enterable and reusable.
- All hardware is of stainless steel.
- All nuts and bolts are captivated.
- Closure may be flash tested.

Applications

- Watertight, Underground, Aerial, Vault and Wall Mountable.
- May be used for inline, branch and butt splicing.

Sizes

- Will hold up to 6 splice trays or 72 fiber optic splices.
- Maximum of 4 cable entries per end.

Sizes

For 12 Splices: WP107400 For 36 Splices: WP107402
For 24 Splices: WP107401 For 48 Splices: WP107403
For 72 Splices: WP107404
